Name of Offeror or Contractor:

SUPPLEMENTAL INFORMATION

The purpose of this amendment is to add the requirement of a FIT test to the solicitation.

Section E
Quality Assurance Provisions

1. Fit Test: A fit test of the item shall be performed, by the contractor, using an appropriate vehicle or a Government approved buck. The contractor shall be responsible for locating and using a vehicle to perform the fit test, if available within a 250 mile radius of the facility where the contract quantity is being manufactured. The contractor may also use a Government-approved buck to perform the fit test at the manufacturing facility. The item shall be installed on the vehicle or approved buck to demonstrate/verify proper fit, form, and function. This fit test is a separate requirement imposed, in addition to examinations and/or tests specified by the drawings, specifications, Supplementary Quality Assurance Requirements (SQAP's), or Quality Assurance Requirements (QAR's) for this contract. At least 20 calendar days before the scheduled fit test, the contractor shall notify the Administrating Contracting Officer, in writing, of the time and location of the test so that the Government may witness the test. A written approval issued by the ACO's Quality Assurance Representative (QAR) shall serve as the Government's approval of the fit test.
2. In the event (1) a vehicle is not available within the specified 250 mile radius, and (2) instructions/drawings for manufacture of the buck are not included in the Technical Data Package cited in the contract, the testing shall be performed by the Government. When Government testing is applicable, the Government shall designate where the test item shall be delivered.
3. The approved test item shall serve as the manufacturing standard. It shall be delivered as part of the contractual quantity with the last scheduled shipment as provided in Section F of the contract. In the event the item fails the fit test, the contractor shall make all necessary adjustments/alterations and repeat the test and approval procedure (or deliver the corrected item to the Government for testing in accordance with Paragraph 2 above), at their own expense. The Government shall have the right to refuse to inspect and/or accept any contract quantity items offered for acceptance prior to Government approval of the fit test.
